

Nome Capital Partners Tasks Hank Virtual Engineering to Increase NOI Across Class A Portfolio

"Hank started as part of our sustainability efforts but has evolved with our portfolio into a key piece of our day-to-day operations. We now include Hank as part of our strategy in new building acquisitions."

- Ling Martin
Sr Asset Manager

20%

Average energy bill reduction per building

Hank's A.I. is able to forecast temperature changes and make real time adjustments to HVAC equipment to drastically reduce energy consumptions

60%

Reduction of HVAC contractor costs

Hank's A.I. predictive equipment control and 24/7 support eliminate the need for contractors on standard HVAC issues

100%

Of Nome's Office Portfolio with Hank

Hank Manages over 1 million square feet of Nome's commercial office portfolio.

Virtual Engineering is the future of building management. The Hank A.I. operates the equipment and a team of engineers provide 24/7 support to reduce costs and improve operational efficiencies.

Already in 2021 Nome has seen energy savings of \$145,000 dollars across their portfolio, which eliminated over 1,000 metric tons of carbon.
